Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, and 23-29, drawn to an exposure method and exposure apparatus, classified in class 355, subclass 53.
 - II. Claims 11-22, 30, 31-44, drawn to a method and an apparatus, classified in class 356, subclass 400.
 - III. Claims 45-55, drawn to an apparatus, classified in class 356, subclass 500.

Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions: Invention I claims an exposure apparatus and exposure method that has a different mode of operation and function as compared to Invention II and Invention III.

Invention I comprises an exposure method as well as contour detecting; Invention II is an apparatus and method comprising: alignment systems and first and second positional measuring systems which are differing modes of detection than Invention I and III; Invention III comprises an interferometer unit which differs from the detection modes of Inventions I and II.

Because these inventions are unrelated for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Art Unit: 2877

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
